KOOKIE CUBE – INDUCTION COOKER

The Kookie Cube induction cooker cooks foods in significantly reduced cooking times, thanks to the innovative induction technology, with a remarkable energy saving (up to 30%). The induced currents heats only the cooktop which is directly in touch with the pot, preventing burns and saving energy. It shuts off automatically when the pot is removed. The digital control panel with display makes it very simple to use. The ceramic cooktop is simple to clean. A magnet is provided, to verify immediately the compatibility of pots.

FEATURES

- Power: 1.600W
- Digital panel with display
